

# TRADE PRICE LIST

June 2012

## Introduction

Structural Insulation Products commenced trading in 2004, offering specialised products to the building trade. The company has since expanded, and is one of the leading suppliers of plastic under floor heating products in the area, including a full range of plastic piping, manifolds, rails, actuators and other ancillary components.

We also offer a full range of thermal and acoustic insulation materials, both structural and industrial.

## BS7291 Class "S" Certified

**Qual-PEX, Qual-PB & Qual-PEX Pipe-in-Pipe pipes meet** the requirements of Class S service conditions specified in tables 1 and 2 of BS 7291-1 2001 which covers specifications for both vented and sealed central heating systems. Qual-Pex pipe also meets the requirements of Class S service conditions specified in Table 1 of ISO EN 15875-1: 2003 for a service life of 50 years.

QPX CUT	PEX/PB Pipe Cutter	£25.54	1	10

## Choice of Manifolds / Pipe Sizes / Termination Fittings

#### CHROME PLAIN MANIFOLD

CODE		UNIT PRICE	PACK QTY
079/410	¾" Header; 2 Outlets	£7.97	10
079/411	¾" Header; 3 Outlets	£10.95	6
079/412	¾" Header; 4 Outlets	£14.56	10
079/415	1" Header; 2 Outlets	£10.41	8
079/416	1" Header; 3 Outlets	£14.05	10
079/417	1" Header; 4 Outlets	£17.81	8

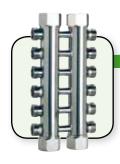

Plain Manifolds suitable for plumbing or heating applications. Male/Female BSP Header threads allow multiple Manifolds to be connected in series. Usually wall mounted with brackets or in a wallbox. Uni Pipe Connectors must be used at outlets.

#### CHROME VALVED MANIFOLD

	CODE		UNII PRICE	FACK UIT
	079/420	¾" Header; 2 Outlets	£22.96	12
	079/421	¾" Header; 3 Outlets	£32.46	8
,	079/422	¾" Header; 4 Outlets	£42.81	6
	079/425	1" Header; 2 Outlets	£24.24	8
	079/426	1" Header; 3 Outlets	£35.38	6
	079/427	1" Header: 4 Outlets	£45.91	4

Valved Manifolds very similar to the plain Manifolds but they have individual shut-off valves on the manifold outlets to isolate individual pipe runs. Supplied with adhesive labelling of the individual outlets. Uni Pipe Connectors must be used at outlets.

## RADIATOR DISTRIBUTION MANIFOLD

CODE		UNIT PRICE	PACK QTY
079/400	¾" Header; 2x2 Outlets	£44.64	1
079/401	¾" Header; 4x4 Outlets	£53.46	1
079/402	¾" Header; 6x6 Outlets	£61.05	1
079/405	1" Header; 6x6 Outlets	£61.32	1
079/406	1" Header; 8x8 Outlets	£75.45	1
079/407	1" Header; 10x10 Outlets	£83.62	1

Radiator Distributor Manifolds for heating systems where the supply and return run from the same side of the Manifold. Very useful for in-floor applications (loose or wallbox) minimising crossovers on piperuns. Unused ports can be blanked off. Uni-Pipe connectors must be used at outlets.

## UNI PIPE CONNECTOR

CODE		UNIT PRICE	BAG QTY
079/450	10mm UNI CONNECTOR	£3.10	50
079/451	12mm UNI CONNECTOR	£3.13	50
079/452	15mm UNI CONNECTOR	£3.06	50
QUAL-PE	HE APPROPRIATE SIZED Q B PIPE INSERTS MUST BE VE CONNECTORS		
079/455	Manifold Spanner	£9.14	1

## **BLANKING ENDS**

CODE		UNIT PRICE	BAG QTY	
079/454	Manifold Outlet Blank Cap	£2.47	30	
079/460	¾" Manifold Body Header Cap (F)	£2.67	50

**Uni-Thread** suitable for use with Uni-Pipe Connectors only.

# Choice of Manifolds / Pipe Sizes / Termination Fittings

## JOINTLESS PIPE BENDS

CODE		UNIT PRICE	BAG QTY
079/960	90° Elbow for 12mm Qual-PEX	£1.25	50
079/961	90° Elbow for 15mm Qual-PEX	£1.25	50
079/956	90° Elbow for 15mm P-I-P	£4.81	50
079/959	90° Elbow for 22mm P-I-P	£7.77	50
079/950	15mm P-I-P Conduit Elbow	£6.89	100
QPX15/C.F.B	. 15mm Metal Cold Forming Bend	£4.84	10
QPX15/PCFE	15mm Plastic Cold Forming Bend	£8.94	10

**Conduit Elbow** (for Qual-PEX pipe-in-pipe) or Cold Forming Bend (for non-ducted Qual-PEX or Qual-PB) allows the pipe to bend neatly through 90° and brought directly up to the appliance, without any joints.

#### TERMINAL FITTINGS

	CODE		UNIT PRICE	BAG QTY
	079/955	Floor/Wall Termination Box		
ı		15mm Qual-PEX to ½" BSP (F)	£12.21	10

**Terminal Wall or Floor Box** allows 15mm Qual-PEX to be terminated at this point and provides a ½" Female BSP thread for connection of copper tube or flexible connector to the appliance.

## WALL BOX

## Cut to Mark. Push to Mark.

## How to make the perfect Qual-FIT Joint

1. CUT

Use only purpose designed pipe cutters and cut the pipe squarely. Ensure the pipe is free from burrs and scratches.

Do NOT use a hacksaw.

#### 2. PIPE INSERT

- Always use the correct pipe insert.
- Grey insert for Qual-PEX
- Orange insert for Qual-PB
- No insert required for copper tube

3. PUSH... FIT

Ensure all cap nuts are hand tightened. Visually check the internal components. Clearly mark the insertion depth on the pipe using the chevron markings provided. Push the pipe firmly and horizontally into the fitting. A secure joint has been made when the correct insertion marking is reached.

4. CHECK

After checking the correct insertion depth has been used, pull back on the pipe firmly to ensure the grab ring engages correctly.

## Disconnecting a Qual-Fit joint.

Ensure that the system is depressurised. Hold the pipe firmly and push the pipe inward toward the joint. Place the demounting clip against the release collet. NOTE: There is no need to remove the cap nut when disconnecting a Qual-FIT joint.

Press the demounting clip against the release collet and then pull the pipe releasing it from the joint.

Do NOT pull the pipe prior to applying the correct inward pressure on the collet. If the pipe is damaged (track marks) after the fitting is disconnected, then cut the pipe back before making another Qual-FIT joint.

## Testing a Qual-Fit joint.

The purpose of system testing is to identify any points where leakages occur at a time when they can be repaired as easily as possible, regardless of their causes. Testing takes place immediately after first fix installation, and before the pipe work is completely covered over. For systems with mechanical connectors, high and low pressure testing is mandatory.

## **WARNING - No pressure test = no guarantee**

Low-pressure test = 3 Bar (air or water) for 15 minutes

High-pressure test= 6 Bar (air or water) for 1 hour

or at least 1.5 times the pressure relief valve setting (if over 6 bar)

Low and high pressure tests are mandatory.

## **BOX PACKS**

## The UFH Box Packs (Cover up to 20m<sup>2</sup>, 30m<sup>2</sup> or 40m<sup>2</sup>)

The UFH Box Packs system is perfectly suited to a single area extension or conservatory up to  $20\text{m}^2$ ,  $30\text{m}^2$  or  $40\text{m}^2$  in floor area. It is easy to install, controlled by its won thermostat and simply needs to be plugged into an electric socket. It is designed to link into an existing radiator heating system or alternatively it can be run as a separate system providing the benefits of an efficient and cost effective underfloor heating system. This type of heating system may be used in conjunction with any oil or gas fired boiler or even a geo-thermal heat pump system.

## The UK UFH Box Pack Kit Comprises

- Pre-assembled UFH Control Unit including thermostatic mixing valve.
- Pump, services valves, mounting bracket and plastic cover box.
- A single programmable room thermostat inc. 3m of cable.
- 100m of 15mm Red Qual-PEX UFH Barrier pipe (20m² pack).
- 150m of 15mm Red Qual-PEX UFH Barrier pipe (30m² pack).
- 2 x 100m coils Red Qual-PEX UFH Barrier pipe (40m² pack).
- Easy to follow instruction booklet and DVD.

## **Features**

- Comfortable even temperature throughout.
- Efficient on fuel due to lower operating temperatures.
- Healthier environment with less dust being circulated.
- Safer no hot panels or dangerous hard edges.
- No restrictions on interior design layout.
- Low maintenance
- Maximum usable floor spaces.
- Connects directly to existing radiator system.
- Independent temperature control for conservatory.
- Excellent value for money.

# NO UNDERGROUND JOINTS ELIMINATES MANHOLE ACCESS REQUIREMENTS

## **QUAL OIL PIPE**

- **Qual-Oil Pipe** is made from PEX material, which makes it durable and yet flexible and easy to install.
- No need to oversize your oil line as Qual-Oil is available in 10mm, 15mm, 22mm & 28mm.
- Qual-Oil Pipe has many advantages over the traditionally used copper pipe, such as:
   Qual-Oil Pipe is impervious to concrete 50m & 100m coils mean no buried joints.
- Qual-Oil Pipe is approved by OFTEC (OFCERT Licence No. 2064099901)

- Aesthetically pleasing conifer green colour compatible with outdoor environment.
- Qual-Oil Pipe can be stored in the open as it is UV stabilised.
- **Qual-Oil Pipe** is resistant to freeze bursting the pipe is tested and rated down to -20°C.
- Qual-Oil Pipe has a 25 year manufacturer's guarantee subject to maximum service conditions of:
   10 Bar at 20°C
   5 Bar at 50°C
- Qual-Oil Pipe is very competitively priced.

\*OTHER COIL LENGTHS AVAILABLE ON REQUEST

## 

## **Installation Guide**

Use only with BS864 compression fittings with Qual-OIL metric size copper inserts. Better still avoid underground joints altogether by using a longer continuous length of Qual-Oil.

**Qual-Oil** pipe should not be used within the building. When installing copper pipework inside, it is necessary to connect the external Qual-Oil pipe with copper pipe at the point of entry of the building. This can be done at the position of the fire valve, which should always be on the outside of the building.

Qual-Oil should not be used on the boiler side of the fire valve.

**Qual-Oil** should not be used within 0.5 metres of the oil burner / boiler. A minimum of 0.5m of flexible steel oil hose complete with fire valve (supplied as standard parts with oil burners) must be used between Qual-Oil pipe and the oil burner / boiler.

**Qual-Oil** pipe is for below-ground use only. BS5410 was amended in March 2001 to include thermoplastic oil lines, which are approved by OFTEC, for below ground applications. For above ground applications metallic pipe must be used.

Do not expose to radiant heat above  $50^{\circ}\text{C}.$  Allow for approx 1% expansion on the length of Qual-Oil pipe in service.

## **Installation Procedure for QUAL-OIL Pipe**

Follow standard OFTEC procedures for below ground installations for oil supply pipelines.

Follow Buried Work Installation Code of Practice for Oil Firing. (BS5410: Part 1: 1997 Section 8.2.4): "Where fuel feed pipework is buried, precautions should be taken to locate the pipe run where the chance of damage from digging or other such activities is minimal. Where this cannot be done, the pipework should be protected".

Such protection can be achieved by installing the pipe in a polythene ducting pipe - available from Pipelife UK (Qual-PEX Duct or MDPE Pipe).

After pipe has been laid, take up the slack before filling trench.

QUAL-Oil should not be connected to either tank or fire valve before trenching system is back filled. Installation using this method allows free movement of the supply line during the back filling procedure avoiding stress on either of the connection points i.e. at either the tank or the fire valve.

Before connection is made an air pressure test of 1 bar should be applied for 15 minutes, then repeated for 30 minutes.

Pipelife manufactures a complete range of polyethylene water and gas pipe. On the water service side, Pipelife produces service pipe in Medium Density Blue Polyethylene (MDPE) and Low Density Black Polyethylene (LDPE). These are manufactured to the highest of international standards which include the British (BS or "kite" mark), Irish (IS), Dutch (KIWA) and Danish (DS) standard marks.
